EDUCATION

RIPHAH INTERNATIONAL UNIVERSITY

- Master of Science Software Engineering

RIPHAH INTERNATIONAL UNIVERSITY

- Bachelor of Science Software Engineering

LEADERSHIP COLLEGE FOR WOMEN

- ICS

SKILLS

- React.js
- JavaScript (ES6+)
- HTML
- CSS
- Bootstrap
- PHP
- Node.js
- REST APIs
- MySQL
- Backend Encryption
- Secure Authentication
- Access Control
- Data Protection
- WordPress
- Elementor
- Git/GitHub

PROFILE

AI-Assisted Full Stack Developer with hands-on ownership of enterprise HRM systems and secure web applications. Experienced in building AI-assisted workflows, attendance automation, leave management, and role-based systems using React.js, Nodejs, MySQL, and modern security practices. Strong focus on data protection, backend encryption, access control, and scalable architecture used in real production environments.

WORK HISTORY

House of Elaan

AI-Assisted Full Stack Developer

1st-june- 2024 - Present

- Lead developer and system owner of a custom HRM CMS using React.js (frontend) and PHP/MySQL (backend).
- Designed and implemented a central HR dashboard displaying attendance status, KPIs, leave summaries, alerts, and internal announcements.
- Built a complete employee management module with advanced search, filters, pagination, and export functionality.
- Implemented attendance automation and validation logic:
- Punch in/out tracking with time validation and audit logging
- Late arrival detection with configurable grace periods
- Automatic shift handling using date-based rules
- Missing attendance detection with automated alerts
- Implemented anti clock-reverse security to block device time tampering.
- Enforced location-based attendance validation, allowing punch in/out only from approved office locations (geo-restricted access)
- Developed leave management workflows with balances, multiple leave types, approval hierarchy, and status tracking.
- Implemented Role-Based Access Control (RBAC):
- User roles and permission templates
- Built monthly attendance and HR reports with filters, print, and export options.
- Developed real-time notifications and alerts for attendance issues and approvals.
- Implemented internal news & announcements module, including image/text posts and WhatsApp integration.
- Secured the HRM system and client websites by:
- Encrypting sensitive backend logic and data handling layers
- Restricting developer-level access to protected code modules
- Implementing secure authentication, authorization, and query optimization
- Designed scalable database schemas and optimized queries for performance and reliability.
- Delivered additional client projects using WordPress, WooCommerce, and custom PHP integrations, ensuring security and performance best practices.

COMPETENCIES

- Full Stack Web Application Development
- HRM & Attendance System Design
- Role-Based Access Control (RBAC)
- Secure Authentication & Authorization
- Backend Data Encryption & Code Protection
- Attendance Automation & Time Validation
- Location-Based Access & Geo-Restrictions
- Database Design & Optimization (MySQL)
- REST API Development & Integration
- Frontend Architecture & UI Consistency
- Performance Optimization & Debugging
- Wordpress elemonter
- AI-Assisted Development & Logic Validation
- Production Deployment & Maintenance

Airblue

Web Developer Intern

2021-01 - 2022-04

- Shadowed developers to learn key details about job duties and tasks.
- Developed web-based applications.
- Developed user interfaces with modern JavaScript frameworks, HTML5, and CSS3.
- Documented project changes in team manuals for future reference and use.
- Prioritized and problem-solved several tasks concurrently with minimum supervision.
- Wrote custom HTML and JavaScript for existing websites.
- Took concepts and produced design mockups and prototypes to strengthen designs, enhance user experiences and improve site interactions.

NOTABLE PROJECTS

HRM Management System

Not live yet

- Designed and developed a custom HRM CMS used for daily employee operations.
- Implemented attendance automation, including punch in/out tracking, late detection, shift rules (Ramadan, Summer, Winter), and missing attendance alerts.
- Enforced location-based attendance validation and anti clock-reverse protection to prevent time fraud.
- Built role-based access control (RBAC) with permission templates and secure authentication.
- Developed leave management workflows, approval hierarchy, and balance tracking.
- Implemented backend encryption and protected logic layers to restrict unauthorized developer access.
- Created HR dashboards, reports, and real-time notifications for management visibility.

iTrust Automobiles (German Client)

itrust-automobile.de

- Developed a website for iTrust Automobiles, a car dealership based in Solingen, Germany, specializing in used cars.
- Delivered a professional website that is user-friendly and helps increase customer engagement.
- The website facilitates easy vehicle discovery for customers, driving more sales and interaction.
- Enhanced brand presence online with a modern, visually appealing design.

Elaan Marketing
elaanmarketing.com

- Elaan Marketing is a real estate marketing company that specializes in promoting luxury residential and commercial projects.
- The website serves as a platform for showcasing ongoing and delivered projects, providing detailed information about properties for prospective buyers.
